CHASE offers 3 tooling Technologies

FOR NON-FERROUS MATERIALS

CHASE-PCD

Polycrystalline Diamond

Our PCD range covers inserts and solid tools with different grades of De beers diamond.

Our CVD range covers insert and solid tools using De beers CVDite material.

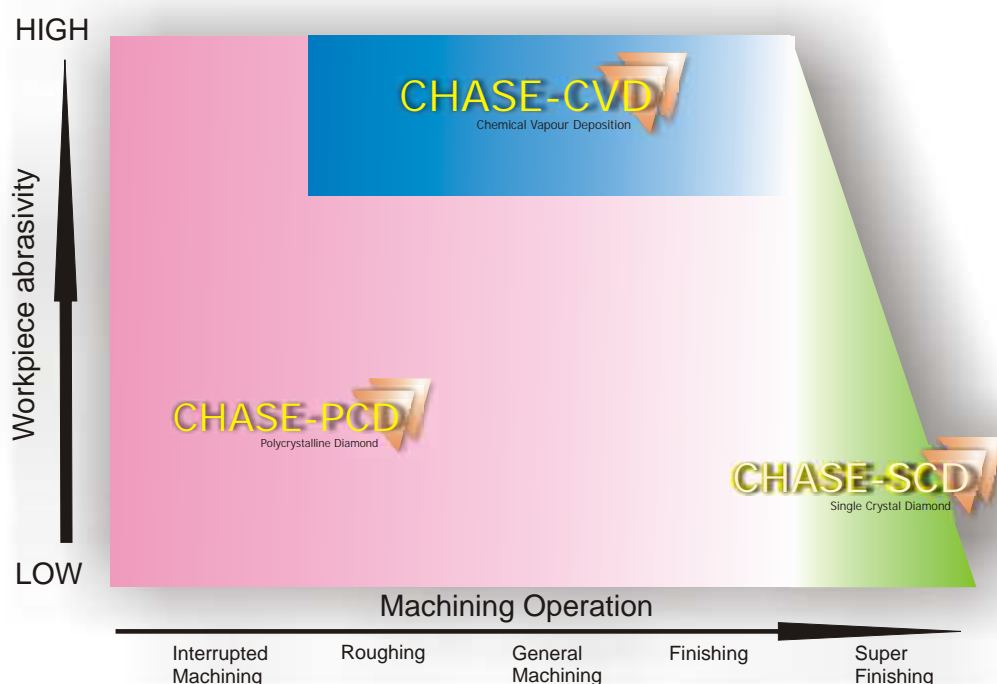

CHASE-CVD

Chemical Vapour Deposition

CHASE-SCD

Single Crystal Diamond

Our SCD range covers insert and solid tools using natural or synthetic diamond. High precision geometry ensuring super finish surfaces.

Many industries are finding the benefits of using diamond tools.

From the lower end PCD tools with all their benefits over standard tungsten carbide, to the high end SCD tools achieving ultra precision optical grade surfaces.

Chase has a tool technology that will be right for your application.

Industrial Manufacturing Applications

AUTOMOTIVE	OPTICAL	ELECTRONICS
AEROSPACE	MARINE	CONTACT LENS
MEDICAL	MILITARY	JEWELLERY

Chase Diamond Tools International is acknowledged as a key manufacturer and supplier of top quality diamond tools to numerous industries throughout the world. Over many years Chase has earned an enviable reputation that reflects the company's refusal to compromise on the highest standards of quality, reliability and customer service

Chase policy of continued investment in new technology and manufacturing methods to our own strict quality standards ensures our tools and services exceed customer expectations.

This is supported by our ISO 9001:2000 certification.

Chase supplies the automotive industries with high quality tools
